Weather Evidence Report

Report ID **WE-2026-07-27-CA19DE53B808** · Data retrieved Nov 5, 2026, 9:33 AM CST

850 CURTISS ST, DOWNERS GROVE, IL, 60515

Date of loss **July 27, 2026** · local day in America/Chicago

Property · Weather station · Warning area · Tornado path · Radar hail · Hail report · Wind report · Tornado report

PEAK WIND GUST	WARNING AREA	NEAREST TORNADO	LARGEST HAIL WITHIN 5 MI
64 mph	**Inside**	**EF0**	**2.5 in**
4:38 PM CDT · KORD, 12.1 mi NNE	Flash Flood Warning & Severe Thunderstorm Warning & Tornado Warning (5) · 11:39 AM CDT – 5:45 PM CDT	Path 0.6 mi WSW at its closest	Reported 0.9 mi ENE, 12:18 PM CDT

Each fact names the record it comes from; details and limitations follow. Records near the property do not by themselves establish conditions at it.

Location

Coordinates	41.79436, -88.00650
County · NWS zones · office	DuPage County, IL · ILC043, ILZ013 · LOT
Location method	US Census Geocoder address match
Address as entered	850 Curtiss St, Downers Grove, IL 60515
Local day	Jul 27, 2026, 12:00 AM CDT to Jul 28, 2026, 12:00 AM CDT (2026-07-27 05:00Z–2026-07-28 05:00Z)

Key findings

Peak wind gust, nearest reporting station	**64 mph** (56 kt) at 4:38 PM CDT (peak-wind remark) — Chicago Ohare Intl Ap KORD, 12.1 mi NNE of the site
Highest gust, other listed stations	**74 mph** (64 kt) at 1:10 PM CDT (peak-wind remark) — Chicago Midway Ap KMDW, 13.0 mi E of the site
Liquid precipitation, nearest station	**1.77 in** at KORD — **incomplete**: 1 of 24 hourly periods have no usable report
Most precipitation, other listed stations	**3.68 in** at Chicago Midway Ap 3Sw (USC00111577), 12.4 mi ESE
Temperature range, nearest station	71–85 °F
Warnings whose polygon contained the site	**5**: Severe Thunderstorm Warning 2026-KLOT-SV-W-0198 (11:39 AM CDT–12:41 PM CDT); Tornado Warning 2026-KLOT-TO-W-0051 (11:55 AM CDT–12:28 PM CDT); Flash Flood Warning 2026-KLOT-FF-W-0037 (12:02 PM CDT–4:00 PM CDT); Severe Thunderstorm Warning 2026-KLOT-SV-W-0213 (4:08 PM CDT–5:30 PM CDT); Severe Thunderstorm Warning 2026-KLOT-SV-W-0219 (5:28 PM CDT–5:45 PM CDT)
Watches / advisories for the site's county or zone	Heat Advisory, Severe Thunderstorm Watch
Nearest tornado (Storm Events)	**EF0**, path passed **0.6 mi WSW** of the site at its closest; 2.1 mi long, 100 yd wide (event 1358902)
Largest hail reported within 5 mi (LSR)	**2.5 inch** (measured), 0.9 mi ENE, 12:18 PM CDT
Largest radar-estimated hail within 5 mi	**4.00 in**, 4.7 mi S, 12:22 PM CDT (KILX)
Lightning, grid cell containing the site	93 NLDN strikes recorded (UTC day 2026-07-27)

Each finding names the record it comes from. Records near the site do not by themselves establish conditions at the property. Detailed records and their limitations follow.

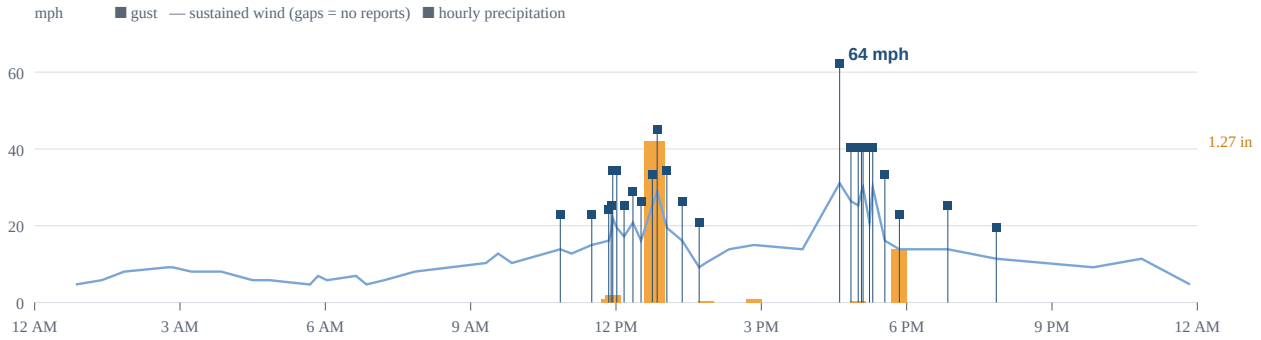

Station-pinned measurements

NOAA GHCNh hourly observations from the nearest stations that reported on July 27, 2026. Every value below was measured at the named station; nothing is blended, averaged across stations or interpolated to the site.

Station	Position from site	Reports	Peak gust	Max sustained	Precip (in)	Temp °F
Chicago Ohare Intl Ap USW00094846 · KORD ASOS/AWOS airport station (METAR)	12.1 mi NNE	61	64 mph · 4:38 PM CDT	31 mph · 4:37 PM CDT	1.77 (1 missing hr)	71–85
Chicago Midway Ap 3Sw USC00111577 Hourly precipitation gauge (NOAA HPD)	12.4 mi ESE	24	not measured	not measured	3.68	—
Chicago Midway Ap USW00014819 · KMDW ASOS/AWOS airport station (METAR)	13.0 mi E	51	74 mph · 1:10 PM CDT	43 mph · 12:51 PM CDT	2.69 (1 missing hr)	68–88
Chicago USW00004831 · KLOT ASOS/AWOS airport station (METAR)	13.7 mi SSW	49	40 mph · 12:45 PM CDT	26 mph · 5:45 PM CDT	0.01 (2 missing hr)	70–84

Observation log — Chicago Ohare Intl Ap (KORD), 12.1 mi NNE of the site

Station USW00094846 at 41.9603, -87.9317, elevation 205 m; ASOS/AWOS airport station (METAR). All 61 reports in the local day are listed: routine hourly METARs and special reports (SPECI) issued when conditions changed.

Wind is the reported 2-minute sustained speed; gust is the peak short-duration speed in the report. A 'PK WND' remark gives the highest instantaneous wind since the previous routine report and is included in the peak gust where it is higher. The highlighted row holds the peak gust.

Precipitation in a report is the running total since the last routine METAR. A blank means the report carried no precipitation group. '<0.01' is a measured trace.

1 hourly precipitation period(s) had no routine report or the station reported its precipitation sensor or amount as unavailable; the daily total excludes them and should be treated as a minimum.

Some reports end with '$', the ASOS maintenance indicator: the station flagged that a sensor needed maintenance when it sent them.

NWS watches, warnings and advisories

Every NWS VTEC event in effect for the site's location during July 27, 2026. For polygon-based warnings, each bulletin's polygon is tested against the site's coordinates.

Event / NWS event ID	In effect (local)	Site relation	Bulletins
Heat Advisory 2026-KLOT-HT-Y-0004	Jul 27, 2026, 2:10 AM CDT – 4:07 PM CDT	County/zone listed (ILZ013)	6
Severe Thunderstorm Warning 2026-KLOT-SV-W-0196	Jul 27, 2026, 11:09 AM CDT – 12:00 PM CDT	Outside polygon — 1.5 mi from its edge	3
Severe Thunderstorm Warning 2026-KLOT-SV-W-0198	Jul 27, 2026, 11:39 AM CDT – 12:41 PM CDT	**Inside warning polygon**	7
Tornado Warning 2026-KLOT-TO-W-0051	Jul 27, 2026, 11:55 AM CDT – 12:28 PM CDT	**Inside warning polygon**	6
Flash Flood Warning 2026-KLOT-FF-W-0037	Jul 27, 2026, 12:02 PM CDT – 4:00 PM CDT	**Inside warning polygon**	2
Tornado Warning 2026-KLOT-TO-W-0052	Jul 27, 2026, 12:10 PM CDT – 12:38 PM CDT	Outside polygon — 4.7 mi from its edge	6
Severe Thunderstorm Watch 2026-KLOT-SV-A-0520	Jul 27, 2026, 2:19 PM CDT – 6:15 PM CDT	County/zone listed (ILC043)	4
Severe Thunderstorm Warning 2026-KLOT-SV-W-0213	Jul 27, 2026, 4:08 PM CDT – 5:30 PM CDT	**Inside warning polygon**	6
Severe Thunderstorm Warning 2026-KLOT-SV-W-0217	Jul 27, 2026, 4:53 PM CDT – 5:40 PM CDT	Outside polygon — 0.7 mi from its edge	4
Severe Thunderstorm Warning 2026-KLOT-SV-W-0219	Jul 27, 2026, 5:28 PM CDT – 5:45 PM CDT	**Inside warning polygon**	2

Bulletin counts include updates (Severe Weather Statements) and are not counts of distinct storms. Full bulletin text is reproduced in Appendix B.

NWS Local Storm Reports within 25 miles

Preliminary reports from spotters, officials, the public and automated stations, as issued by NWS offices, with each report's position relative to the site.

L277	Weber and Taylor Rd - 6 inches of standing water	202607272111-KLOT-NWUS53-LSRLOT
L278	Weber and Taylor Rd - 6 inches of standing water	202608040110-KLOT-NWUS53-LSRLOT
L279	Photo shows hail stone at least 3 inches in diameter that fell near Four Seasons Park in Shorewood. Hail stone was collected and frozen 2 minutes after it fell. Multiple other hail stones golf ball size. Time estimated by radar	202607280003-KLOT-NWUS53-LSRLOT
L280	Photo shows hail stone at least 3 inches in diameter that fell near Four Seasons Park in Shorewood. Hail stone was collected and frozen 2 minutes after it fell. Multiple other hail stones golf ball size. Time estimated by radar	202608040110-KLOT-NWUS53-LSRLOT
L281	Video shared to social media shows several inches of standing water on roadway in western Joliet. Time estimated	202607280043-KLOT-NWUS53-LSRLOT
L282	Video shared to social media shows several inches of standing water on roadway in western Joliet. Time estimated	202608040110-KLOT-NWUS53-LSRLOT
L285	Multiple reports of large branches downed onto power lines on the southeast side of Wheeling. Time based on peak gust at nearby PWK ASOS	202608040110-KLOT-NWUS53-LSRLOT
L286	Multiple reports of downed trees, large tree branches, and power lines in Arlington Heights with mid-afternoon round of storms. Time estimated from radar	202608040110-KLOT-NWUS53-LSRLOT
L287	Power lines downed. Time estimated from radar	202608040110-KLOT-NWUS53-LSRLOT
L288	Numerous huge tree limbs blown down on Millburn Street, one on top of a car. Some trees uprooted	202608040110-KLOT-NWUS53-LSRLOT
L289	Photo on social media showed a tree 2 to 3 feet in diameter snapped 20 feet above the ground. Numerous other large tree limbs blown down	202608040110-KLOT-NWUS53-LSRLOT

#	Remark	Product
L290	Peak gust of 56 knots at the Harrison-Dever Crib 3 miles offshore from Chicago	202608040110-KLOT-NWUS53-LSRLOT
L291	ASOS site ORD Chicago Ohare Airport reported 62 mph peak gust	202607280157-KLOT-NWUS53-LSRLOT
L292	Updates previous tstm wnd gst report from 1 NE Bensenville. ASOS site ORD Chicago Ohare Airport reported 64 mph peak gust	202608040110-KLOT-NWUS53-LSRLOT
L293	Private weather station KILCHICA1231 reported 63 mph gust	202607272209-KLOT-NWUS53-LSRLOT
L294	Private weather station KILCHICA1231 reported 63 mph gust	202608040110-KLOT-NWUS53-LSRLOT
L295	Calumet Harbor National Ocean Service tidal gauge station reported 47 knot peak gust	202608040110-KLOT-NWUS53-LSRLOT
L296	River gauge on Lake Michigan at Chicago Lock reported multiple water level fluctuations up to 2.7 feet over 20 minutes. Possible meteotsunami	202608040110-KLOT-NWUS53-LSRLOT

NCEI Storm Events Database

NOAA's reviewed record of significant weather, compiled by NWS offices after the event. Events overlapping the local date within 25 miles of the site, or listed for the site's county or forecast zone.

Edition 2026-10-26; this edition covers events through 2026-07.

Magnitude: hail in inches; wind in knots (MG measured, EG estimated); tornadoes by EF rating. Tornado distance is to the straight line between the published start and end points, an approximation of the damage path.

Event narratives (as published)

#	Narrative
S03	Trees and power lines were blown down.
S04	There were two reports of trees and power lines blown down.
S05	A power line was blown down onto Barlett Road just east of Route 59.
S06	Several trees and tree limbs were blown down.
S07	There were two reports of large tree limbs and power lines blown down.
S08	Multiple tree limbs were blown off of a mature tree.
S09	A video showed a strong gust of wind which knocked down large tree limbs. A power flash could be seen in the background.
S10	A photo showed a large tree limb blown down on Arlington Circle.
S12	Power lines were blown down.
S13	Hail up to the size of golf balls fell for 15 minutes.
S14	Photos showed an unhealthy tree snapped or uprooted near Schick Road and Gary Avenue.
S16	A localized block of tree damage occurred near Lies Road and County Farm Road.
S19	A photo showed a large tree limb snapped off of a tree and hanging on power lines. Numerous tree limbs were blown down between Fullerton Avenue and Schmale Road to Schubert Avenue and President Street.
S20	A lot of tree damage was reported at the Klein Creek Golf Club.
S21	Several streets were closed due to flooded roadways in Addison.
S22	A large tree two feet in diameter was snapped.
S24	Two trees and several large tree limbs were blown down on the DuPage County Campus.
S25	Photos showed a tree snapped at its base and a large tree limb snapped near Diversey Avenue and Mill Road.
S27	A photo showed half dollar size hail near 67th Street and Claredon Hills Road.

#	Narrative
S29	Photos showed a tree limb blown down on Oakview Drive.
S32	A brief tornado with estimated peak winds of 75 mph touched down southwest of the intersection of Stacy Court and Railroad Street. This tornado moved generally southward causing mainly tree and power line damage along its path. A few homes and one car were damaged. The tornado ended near the intersection of Hawthorne Boulevard and Park Boulevard.
S33	A brief tornado with estimated peak winds of 80 mph touched down near Liberty Drive just west of Hillside Court. A concentrated corridor of damage occurred in the vicinity of Indiana Street and Campbell Avenue along Pershing Avenue where the tops of several softwood trees were snapped and numerous tree limbs were blown down. The tornado continued moving southward producing sporadic tree damage until it ended near Alchester Drive and Wales Drive.
S34	Nickel to quarter size hail was reported with some melting before the measurement.
S36	Large tree limbs were blown down.
S37	A photo showed a broken tree limb near 22nd Street and Blanchard Street. Another large tree limb was broken near Fawell Boulevard and Lambert Road.
S38	A photo showed baseball size hail near McIntosh Avenue and Burlington Avenue. Car windshields were broken.
S39	Multiple tree limbs were blown down.
S41	A large tree limb was blown down onto a house causing roof damage near Grace Street and Le Moyne Avenue.
S42	Trees and fences were blown down along Naperville Road between Route 38 and Route 56. Numerous tree limbs were blown down just east of Warrenville Road.
S43	Multiple large tree limbs were blown down near Pleasant Lane and La Londa Avenue. Some of the tree limbs damaged houses.
S45	A photo showed tree limbs blown down.
S46	A tree limb was blown down onto a power line near Roosevelt Road and Meyers Road.
S47	Hail up to half dollar size was reported near 55th Street and Willow Springs Road. Most hail was nickel size.
S48	A photo showed quarter to half dollar size hail.
S50	A measured wind gust to 72 mph was reported near Oakbrook Terrace.
S51	Trees and tree limbs were blown down, partially blocking roads.
S53	A photo showed a large tree limb blocking Glen Park Road near Lloyd Avenue.
S54	A photo showed a hailstone roughly two inches in diameter.
S55	A few tree limbs were broken near Regent Drive and Mockingbird Lane.
S56	A five inch diameter tree limb was broken near Maple Avenue and Belmont Road. Another tree was uprooted or snapped nearby along Maple Avenue.
S58	Multiple large tree limbs were blown down in the Orchard Brook Subdivision.
S59	Vehicles were damaged by hail up to two inches in diameter.
S60	A tornado with estimated peak winds of 85 mph touched down near the intersection of Maple Avenue and Brookbank Road. The tornado produced mainly tree damage along its path, including snapped and uprooted trees. The tornado moved generally southeast until it crossed 59th Street, where it began to move mainly southward. The tornado ended in McCollum Park where multiple tree limbs were blown down.
S62	A large tree limb was blown down along Herrick Road near Galusha Avenue.
S65	Numerous large tree limbs were blown down.
S66	Several photos showed golf ball size hail in Downers Grove.
S68	Multiple large tree limbs were blown down near 83rd Street and Lemont Road. At least one evergreen tree was uprooted.
S69	Trees were blown down onto power lines, resulting in utility poles being brought down.
S70	Hail up to 2.5 inches in diameter was reported in Westmont.
S71	Photos showed several inches of water on roadways and in parking lots near Butterfield Road.
S72	A small tree limb was broken near Plainfield Road and Cass Avenue.
S73	Several tree limbs 2 to 3 inches in diameter were blown down. One large tree was split in half.
S74	A large section of roofing material was peeled towards the southwest on the roof of a swimming school facility on Quincy Street, south of 75th Street. Multiple HVAC units on the same roof were blown over.
S75	A photo showed tree limbs blown down and a small tree limb blown through a car windshield near Route 83 and Mockingbird Lane.

#	Narrative
S76	Widespread tree and power line damage was reported in and near Burr Ridge with utility poles blown down.
S77	A lot of trees were blown down onto trails in the Red Gate Woods Forest Preserve.
S78	A photo showed flowing water 12 inches deep near McIntosh Avenue and Burlington Avenue.
S79	Large tree limbs were blown down in Argonne Park near Cass Avenue.
S80	A 10 meter high wind sensor measured a wind gust to 78 mph. A nearby two foot diameter willow tree was blown down.
S81	Large tree limbs were blown down.
S82	A tornado with estimated peak winds of 80 mph touched down just northeast of the intersection of Route 53 and Material Road. The tornado moved southward and crossed Route 53 north of Airport Road producing sporadic tree damage. The tornado then moved across the Lewis University campus where numerous tree limbs were snapped and blown down. A dugout and fencing material at a baseball field were damaged. An HVAC system on the roof of a building was damaged. The tornado turned to the southwest producing tree damage and then ended just south of Renwick Road.
S84	Numerous trees, tree limbs and power lines were blown down in Lemont.
S85	Six to eight inches of standing water was reported along Plainfield Road.
S87	A 10 foot long tree limb was blown down near Parker Road and 143rd Street.
S88	A tree trunk was snapped near the top of the tree near 96th Street and Mayfield Avenue and a large tree limb was broken near 97th Street and Mayfield Avenue.
S89	A tornado with estimated peak winds of 85 mph touched down just north of 131st Street, west of Wolf Road. Several trees were upended or completely split off in the Tampier Lake Forest Preserve. Numerous trees and tree limbs were blown down along the path as the tornado moved southeast. The tornado ended between Highland Avenue and Hale Drive, just north of 151st Street.
S91	Photos showed numerous tree limbs blown down in Homer Glen.
S92	A photo showed multiple tree limbs blown down.
S93	Photos showed multiple tree limbs blown down between 131st Street and 143rd Street. Multiple roads were blocked near Bunratty Park.
S94	Damage was reported to utility poles near Greenwood Street and Dodge Avenue.
S95	Photos showed multiple tree limbs blown down in Evanston. Multiple boats were flipped over along the Lake Michigan Shore.
S96	A photo showed a 1 to 2 foot diameter oak tree that was snapped and then fell onto the roof of a shed.
S97	Structual damage was reported to a house in the 8700 block of W 167th Place.
S98	A wind gust to 74 mph was measured near W 85th Street and Mobile Avenue.
S99	Nickel to quarter size hail was reported.
S100	Numerous tree limbs were blown down in Mokena. A one foot diameter tree was partially uprooted.
S101	Photos showed multiple utility poles broken along 80th Avenue, just south of 171st Street. Multiple large tree limbs were blown down nearby.
S102	A personal weather station measured a wind gust to 60 mph.
S103	Video showed a sports dome that collapsed near 191st Street and 76th Avenue.
S104	Numerous trees, tree limbs, power lines and fences were blown down. Roof, siding and trim damage occurred to several homes in Frankfort Square.
S105	A photo showed a large tree uprooted at Rogers Beach Park.
S106	A gas station canopy partially collapsed at the corner of Center Road and Laraway Road.
S107	Trees and tree limbs were blown down in Rogers Park.
S108	Trees approximately one foot in diameter were snapped and patio doors were blown out of homes along Ridgeland Avenue between Vollmer Road and Lincoln Highway.
S109	A wall was damaged at a public works building near Sangmeister Road and Center Road.

#	Narrative
S110	Numerous tree limbs were blown down in Norwood Park.
S111	Numerous tree limbs were blown down in Edison Park.
S112	Numerous tree limbs were blown down in Forest Glen.
S113	Numerous tree limbs were blown down in West Ridge.
S114	Roadway, parking lot and yard flooding was reported along Nashville Avenue near 66th Street in Bedford Park. Water was nearing entrances of structures. Flowing water 12 inches deep was reported near 74th Street and Roberts Road. Widespread street flooding was reported in Summit with one vehicle stuck in a flooded underpass. A photo showed a few inches of standing water on a residential street in Burbank. Rainfall amounts included 3.95 inches near Bridgeview and 3.93 inches near Chicago Lawn.
S115	Photos and videos showed several inches of water on roadways, parking lots and yards near the Western Springs Metra train station.
S116	Flash flooding was reported in multiple areas in Evanston and northern Chicago. Rainfall amounts included 3.17 inches near Evanston and 2.97 inches in Rogers Park.
S117	A large tree limb was blown down blocking Ashland Avenue near West Albion Avenue.
S118	Numerous tree limbs 4 to 8 inches in diameter were blown down along with a few tree limbs one foot in diameter east of Ridgeland Avenue between 151st Street and 159th Street. Power lines were also blown down.
S120	Numerous tree limbs were blown down in Jefferson Park.
S121	Numerous tree limbs were blown down in Edgewater.
S124	Video and a photo showed tree limbs blown down in Country Club Hills with at least one tree uprooted.
S125	Numerous tree limbs were blown down in Lincoln Square.
S126	A tornado with estimated peak winds of 110 mph touched down just east of Interstate 57 near 173rd Street. The tornado moved east and crossed Interstate 80 southwest of Crawford Avenue. Trees and tree limbs were blown down and roofing material was removed from multiple apartment buildings along 171st Street. The tornado crossed the junction of Interstate 80 and Interstate 294 and began moving to the northeast as it began a counter-clockwise loop. The tornado produced tree damage and cosmetic structure damage as it moved north. The tornado turned northwest after crossing 159th Street and reached its northernmost point between 155th Street and 154th Street. The tornado turned back to the south and accelerated as it crossed 159th Street again. The tornado was likely at peak intensity as it removed a roof from an industrial building on 167th Street and caused exterior roof and wall damage to an apartment complex on 171st Street. The tornado crossed its earlier path near 169th Street and Anthony Avenue. The tornado crossed Interstate 80 for a third time west of Dixie Highway as it moved southeast across a railroad yard. Four double-stacked intermodal containers were tipped over in the rail yard. Numerous trees were damaged nearby. The tornado continued producing tree damage until it ended near Chicago Heights-Glenwood Road, just east of Thorn Creek.
S127	A large section of a roof was torn off of a house in the Cricket Hill subdivision of Matteson.
S128	Numerous trees, tree limbs, utility poles, power lines and fences were blown down in Matteson.
S130	Numerous tree limbs were blown down in Uptown.
S131	Numerous tree limbs were blown down in North Center.
S132	Numerous tree limbs were blown down in Irving Park.
S133	A personal weather station measured a wind gust to 59 mph.
S134	A photo showed a broken utility pole that fell onto two parked vehicles at a business at the corner of Belmont Avenue and Knox Avenue.

#	Narrative
S135	Numerous tree limbs were blown down in Lake View.
S136	Numerous tree limbs were blown down in Avondale.
S137	Numerous tree limbs were blown down in Montclare.
S138	Numerous tree limbs were blown down in Hermosa.
S140	Multiple large tree limbs and power lines were blown down.
S141	Wind gusts were estimated to 60 mph.
S143	Tree limbs were blown down across Flossmoor.
S144	Numerous tree limbs were blown down in Lincoln Park.
S145	Numerous tree limbs were blown down in Logan Square.
S146	Numerous tree limbs were blown down in Belmont Cragin.
S147	Two workers inside an underground sewer system became trapped by rising waters and were swept away inside of the sewer system. They were originally working in the 800 block of Curtiss Street. One of the workers was located a few hours later about 200 feet from the original point of entry and was taken to a hospital in good condition. The second worker was recovered the next day and pronounced dead at the scene.
S148	A photo showed water covering part of Lake Shore Drive near Montrose Avenue.
S149	Video showed several inches of standing water on the shoulder and at least one lane of Interstate 57 near 167th Street.
S151	A personal weather station measured a wind gust to 66 mph.
S152	A personal weather station measured a wind gust to 68 mph before power was lost.
S153	Numerous trees, large tree limbs and power lines were blown down in Olympia Fields.
S154	Numerous tree limbs were blown down in Humboldt Park.
S156	Extensive tree damage occured in Homewood. Hundreds of trees were blown down in the the Governors Park neighborhood. Multiple mature trees were uprooted and fell onto homes, power lines and at least one utility pole. Extensive tree damage also occurred along Center Avenue and Center Court with many uprooted or snapped trees.
S157	Numerous tree limbs were blown down in Austin.
S158	All lanes of Interstate 80 were closed due to power lines blown down near Kedzie Avenue.
S159	Two to three inches of water was reported on all four lanes of 171st Street near 94th Avenue.
S160	A photo showed a viaduct on Dixie Highway flooded and closed near Pine Road. Rainfall of 2.50 inches was reported near Homewood.
S161	A few tree limbs were blown down in North Lawndale and South Lawndale.
S162	A few tree limbs were blown down in the Near West Side and Lower West Side.
S163	A personal weather station measured a wind gust to 62 mph.

#	Narrative
S165	An industrial building collapsed and a semi truck was rolled over.
S166	Photos showed several inches of standing water on Western Avenue near Route 30. Additional photos showed at least several inches of standing water on residential streets in Matteson. Rainfall amounts included 2.57 inches near Flossmoor and 2.50 inches near Matteson.
S168	A photo showed a large tree that fell onto a house causing damage in the 2700 block of South Oak Park Avenue.
S170	Numerous tree limbs were blown down in Archer Heights.
S172	Numerous tree limbs were blown down in West Elsdon and Gage Park.
S173	Numerous tree limbs were blown down in Washington Park.
S174	Numerous tree limbs were blown down in West Lawn.
S175	Numerous tree limbs were blown down in Garfield Ridge and Clearing.
S176	Numerous tree limbs were blown down in Woodlawn.
S177	Numerous tree limbs were blown down in Chicago Lawn.
S178	Numerous tree limbs were blown down in West Englewood and Englewood.
S179	Numerous tree limbs were blown down in Greater Grand Crossing.
S180	Numerous tree limbs were blown down in South Shore.
S181	Part of the roof of a store was blown off at the corner of 79th Street and Western Avenue.
S182	Numerous tree limbs were blown down in Washington Heights and Roseland.
S183	Numerous tree limbs were blown down in Beverly. A photo showed a large tree blown down onto a car.
S184	Numerous tree limbs were blown down in Morgan Park.
S186	Numerous tree limbs were blown down in West Pullman.
S187	A brief period of quarter size hail was reported near Kedzie Avenue and Touhy Avenue.
S188	A large tree fell on top of a school bus on the entrance ramp to Interstate 90/94, just west of the intersection of Belle Plaine Avenue and Keeler Avenue. The school bus driver was reported to be injured with no other information available. All of the children on the bus were reportedly uninjured.
S189	Street flooding was reported in multiple areas in Aurora.
S190	Street flooding was reported in multiple areas in western Naperville.
S191	Six inches of standing water was reported at Weber Road and Taylor Road.
S192	Golf ball size hail was reported near Caton Farm Road and County Line Road.
S196	A photo showed a hail stone at least 3 inches in diameter that fell near Four Seasons Park. Multiple other hail stones were golf ball size.

#	Narrative
S198	Video showed several inches of standing water on a roadway in Joliet.
S199	Multiple tree limbs were blown down onto power lines on the southeast side of Wheeling.
S200	Multiple trees, large tree limbs and power lines were blown down in Arlington Heights.
S201	Power lines were blown down.
S202	A photo showed a tree 2 to 3 feet in diameter snapped roughly 20 feet above the ground. Numerous other large tree limbs were blown down.
S203	Winds gusted above 34 knots for 24 minutes with a peak gust to 56 knots.
S205	A personal weather station measured a wind gust to 63 mph.

Episode context (printed once per episode)

Episode 215254. Multiple supercell thunderstorms moved from north to south across northeast Illinois from the late morning through the early evening of July 27th. Widespread and extensive wind damage occurred in many areas. Large hail occurred in many areas. A total of seven tornadoes occurred. Flooding was reported in numerous areas. At the peak of the storms, at least 500,000 customers were without power in northeast Illinois.

Episode 215256. Scattered supercell thunderstorms moved north to south across parts of southern Lake Michigan from the late morning through the afternoon of July 27th, producing severe winds, high waves and a seiche.

Hail and lightning

NEXRAD radar hail detections within 15 miles

Radar-estimated maximum hail size for each storm cell on each radar scan (NEXRAD Level-III hail algorithm, via NOAA SWDI). These are estimates of hail aloft, not ground measurements; several radars may detect the same storm.

Lightning strike counts within 15 miles

Counts of NLDN lightning strikes per 0.1° grid cell (about 6–7 miles across) per UTC day, as published by NOAA NCEI. Point-level strike locations and times are licensed data and are not included. A UTC day runs from 7 PM to 7 PM Eastern Standard Time (adjust for other zones), so a count can include strikes outside the local date.

Cell centre	From site	Strikes 2026-07-27 UTC	Strikes 2026-07-28 UTC
41.8, -88.0	**contains the site**	93	0
41.8, -88.1	4.8 mi W	49	0
41.8, -87.9	5.5 mi E	109	0
41.7, -88.0	6.5 mi S	130	0
41.9, -88.0	7.3 mi N	49	0
41.7, -88.1	8.1 mi SW	73	0
41.7, -87.9	8.5 mi SE	125	0
41.9, -88.1	8.7 mi NNW	26	0
41.9, -87.9	9.1 mi NE	61	0
41.8, -88.2	10.0 mi W	58	0
41.8, -87.8	10.6 mi E	80	0
41.7, -88.2	11.9 mi WSW	70	1
41.9, -88.2	12.3 mi NW	31	3

Cell centre	From site	Strikes 2026-07-27 UTC	Strikes 2026-07-28 UTC
41.7, -87.8	12.5 mi ESE	69	0
41.9, -87.8	12.9 mi NE	34	0
41.6, -88.0	13.4 mi S	82	0
42.0, -88.0	14.2 mi N	35	0
41.6, -88.1	14.3 mi SSW	59	5
41.6, -87.9	14.5 mi SSE	94	0

A count of 0 means the cell is not in the published file for that day; NCEI lists only cells with at least one strike.

KORD also reported thunder or lightning in 27 report(s), first at 10:51 AM CDT (see the observation log).

Sources and limitations

Data sources

Station measurements: NOAA NCEI Global Historical Climatology Network – hourly (GHCNh), per-station per-year files. Units converted from metric for display. Quality codes: '2', '3', '6', '7' mark suspect or erroneous values in the legacy source; lowercase letters mark GHCNh checks the value failed; unflagged values passed or were not checked.

Warnings and bulletins: NWS VTEC events and the verbatim text of NWS bulletins, retrieved from the Iowa Environmental Mesonet archive of NWS products (Iowa State University). Zones from api.weather.gov.

Local Storm Reports: NWS Local Storm Reports via the Iowa Environmental Mesonet. Preliminary; duplicates and corrections are reproduced as issued.

Storm Events: NOAA NCEI Storm Events Database bulk CSV (edition noted in that section).

Hail and lightning: NOAA NCEI Severe Weather Data Inventory (NEXRAD Level-III hail) and NCEI daily NLDN lightning tile counts.

Location: US Census Bureau Geocoder; timezone from coordinates (IANA tz database).

Area map: USGS The National Map topographic basemap (public domain), shown muted; records are drawn at their published coordinates. Storm report positions are often approximate.

Distances and bearings

Distances are great-circle miles from the site's coordinates; bearings are the direction from the site to the record (e.g. '4.6 mi WSW' means the record lies west-southwest of the site). A record's own position may be approximate: storm reports are often given to the nearest town or road.

What this report establishes

This report compiles public US government weather records for the selected location and date. Records near the site do not by themselves establish conditions at the exact property. Missing values are not zero, and 'not published yet' is different from 'no record'. It does not determine property damage, causation, insurance coverage or legal admissibility, and it is not a certified government record or expert opinion.

Retrieval and report identity

Data retrieved: Nov 5, 2026, 9:33 AM CST. Report ID: WE-2026-07-27-CA19DE53B808. Every source response used is stored unmodified; the hashes below identify those exact bytes, and the report ID is derived from them and their retrieval times, so this report can be regenerated byte-for-byte and verified.

BULLETIN - EAS ACTIVATION REQUESTED
Tornado Warning
National Weather Service Chicago/Romeoville
1155 AM CDT Mon Jul 27 2026

The National Weather Service in Chicago has issued a

* Tornado Warning for...
  Eastern DuPage County in northeastern Illinois...

* Until 1245 PM CDT.

* At 1154 AM CDT, a severe thunderstorm capable of producing a
  tornado was located over Glendale Heights, moving southeast at 20
  mph.

  HAZARD...Tornado.

  SOURCE...Radar indicated rotation.

  IMPACT...Flying debris will be dangerous to those caught without
           shelter. Mobile homes will be damaged or destroyed.
           Damage to roofs, windows, and vehicles will occur.  Tree
           damage is likely.

* This dangerous storm will be near...
  Wheaton, Downers Grove, Lombard, Glen Ellyn, Oak Brook, Westmont,
  Lisle, and Villa Park around 1200 PM CDT.
  Woodridge, Hinsdale, and Clarendon Hills around 1205 PM CDT.
  Darien and Willowbrook around 1210 PM CDT.

Other locations in the path of this tornadic thunderstorm include
Burr Ridge, Lemont and Willow Springs.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

TAKE COVER NOW! Move to a basement or an interior room on the lowest
floor of a sturdy building. Avoid windows. If you are outdoors, in a
mobile home, or in a vehicle, move to the closest substantial shelter
and protect yourself from flying debris.

BULLETIN - EAS ACTIVATION REQUESTED
Flash Flood Warning
National Weather Service Chicago IL
1202 PM CDT Mon Jul 27 2026

The National Weather Service in Chicago has issued a

* Flash Flood Warning for...
  Cook County in northeastern Illinois...
  Eastern DuPage County in northeastern Illinois...

* Until 400 PM CDT.

* At 1202 PM CDT, Doppler radar and automated rain gauges indicated
  thunderstorms producing rainfall rates of 1 to 2 inches per hour.
  Up to 2 inches of rainfall has occurred due to these storms in
  northwestern Cook County. Flash flooding is ongoing or expected to
  begin shortly.

  HAZARD...Flash flooding.

  SOURCE...Radar and automated gauges.

  IMPACT...Rapid-onset flooding of creeks, streams, drainage
          ditches, streets, underpasses, low-lying areas, and
          other poor drainage areas.

* Some locations that will experience flash flooding include...
  Chicago, Cicero, Arlington Heights, Evanston, Schaumburg,
  Bolingbrook, Palatine, Skokie, Des Plaines, Oak Lawn, Berwyn,
  Mount Prospect, Wheaton, Hoffman Estates, Oak Park, Downers Grove,
  Glenview, Elmhurst, Lombard and Buffalo Grove.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

A Flash Flood Warning means rapid-onset flooding is imminent or may
already be occurring. Persons along creeks, drainage ditches, and
other waterways should take immediate precautions to protect life
and property.

BULLETIN - EAS ACTIVATION REQUESTED
Tornado Warning
National Weather Service Chicago/Romeoville
1210 PM CDT Mon Jul 27 2026
```

```
The National Weather Service in Chicago has issued a

* Tornado Warning for...
  North central Will County in northeastern Illinois...
  Southeastern DuPage County in northeastern Illinois...
  South central Cook County in northeastern Illinois...

* Until 115 PM CDT.

* At 1209 PM CDT, a severe thunderstorm capable of producing a
  tornado was located over Downers Grove, moving southeast at 30 mph.

  HAZARD...Tornado.

  SOURCE...Radar indicated rotation.

  IMPACT...Flying debris will be dangerous to those caught without
           shelter. Mobile homes will be damaged or destroyed.
           Damage to roofs, windows, and vehicles will occur.  Tree
           damage is likely.

* This dangerous storm will be near...
  Bolingbrook, Woodridge, Lemont, Burr Ridge, Darien, and Willow
  Springs around 1215 PM CDT.
  Orland Park and Homer Glen around 1225 PM CDT.

Other locations in the path of this tornadic thunderstorm include
Tinley Park, Mokena, Frankfort, Frankfort Square, Matteson, Country
Club Hills, Richton Park, Olympia Fields and Park Forest.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

TAKE COVER NOW! Move to a basement or an interior room on the lowest
floor of a sturdy building. Avoid windows. If you are outdoors, in a
mobile home, or in a vehicle, move to the closest substantial shelter
and protect yourself from flying debris.
